Declaration of conformity to REACH

This declaration of conformity applies to all unpopulated printed circuit boards produced by hmp HEI-DENHAIN-MICROPRINT GmbH.

At hmp, the substances on the candidate list (SVHC), the substances subject to authorisation (Annex XIV) and the list of restrictions (Annex XVII) are updated twice a year and compared with the substances used.

We have obtained all necessary information about the registration of concerned chemicals of our REACH-suppliers. In this connection we also have examined carefully, that substances from the actual candidate list (SVHC) of the ECHA are not contained.

Substances from the SVHC list only occur as components of a few mixtures. Due to the low concentrations of the substances in the mixtures and the production processes in which these mixtures are used, the limits for the information and reporting requirements are never exceeded in the mixtures or in our products.

In addition, we are aware of the fact that this regulation has impact on the entire chain of delivery, which requires an efficient cooperation and communication with suppliers and customers necessary, what is also desired on our side. Hence, we will timely inform you in case we will be forced to register any substance which our products contain or if our suppliers will be obligated to take substances off the market, also in order to call upon your support if necessary.
